imation

Imation RDX® Media Secure

WITH CYBERSAFE™ PRO SECURITY TECHNOLOGY

Now Powerful Data Security is Remarkably Easy

If you are dealing with sensitive or regulated data that you need to share and transport, safeguard it with Imation RDX® Media Secure — the world's first removable hard disk drive with built-in encryption technology.

Easy, Foolproof Encryption

- Simple, one-time software installation. "Set it and forget it" for automatic encryption of all data written to the RDX media

Integrates into Existing Infrastructure

- Application-agnostic, doesn't require specific backup software
- Can be used with existing direct-attach RDX docking station (internal or external), no new hardware required
- Maintains RDX standard compatibility; functions as standard RDX cartridge if client software not installed on host computer

Secure Data Shuttling

- Encryption features help ensure safe delivery of data to remote offices or customers
- Rugged, shock-resistant RDX cartridge helps protect against damage that can occur during transport

RDX MEDIA SECURE FEATURES

CYBERSAFE™ PRO SECURITY TECHNOLOGY
A unique blend of on-board security technologies that ensures the safety, privacy and control of your digital content.

- **ENCRYPTION**
